

ADVANCING INDUSTRIAL AUTOMATION

IEC 61499 IN THE INDUSTRY

Join us for a comprehensive exploration of the latest advancements
and practical applications in the industrial sector!

EVENT HIGHLIGHTS

End Users

Industry leaders presenting on new technologies to boost production efficiency, optimize supply chains, and maintain high drug manufacturing standards

System Integrators

Insights on seamless integration of automation technologies and sustainable industrial solutions

Startups

Innovative methods simplify tech integration, enhance real-time monitoring, and drive AI automation

Technology Vendors

Latest technological solutions shaping the future of industrial automation

WHY ATTEND?

- Gain valuable insights into the current landscape of industrial automation
- Discover the latest technological advancements
- Learn practical guidance on integrating innovations into existing systems
- Foster collaboration and knowledge exchange to drive the industrial sector forward

WORKSHOP FORMAT

Half day event, based on invited presentations.

For details, refer to the Call for Workshops and the [ETFA 2025 website](#) or contact ✉ [ŠEJLA TRAKIĆ](#).

→ **REGISTRATION**

Registration will be available starting from July 2025
